

Firm Profile

Chroma Design Inc. is a landscape architecture firm with a thoughtful, art-based approach to urban design, landscape architecture, and bridge aesthetics. Doug Lamson utilized his extensive experience with national and international design and planning firms to establish Chroma Design in 2007. The firm is now a consulting practice that offers personalized planning, site design, and bridge aesthetics services to public and private clients throughout the United States.

Chroma Design's mission is to help clients succeed in creating attractive, dynamic, and enduring places, bridges, and monuments that give back to the community in which they are built. Our mission is accomplished with a streamlined design process that yields exceptional results. We offer clients a direct, hands-on approach to creating sustainable results that will endure the test of time.

At Chroma Design we enjoy serving clients that seek to push the envelope, challenge typical expectations, and find more sustainable ways to design and construct. Chroma Design provides high quality services to clients that are looking for strong design, quick results, and well-built projects. The firm offers expertise in the following areas:
