

Resume

Doug Lamson is a passionate landscape architect with twenty-nine years of diverse professional experience. He founded Chroma Design after spending more than a quarter century working for national planning and design firms in Boston and Denver. He is best known for his direction of large, multi-disciplinary planning, site design, and bridge aesthetics projects throughout the United States. Doug's proven approach to design utilizes his broad-based skills to provide clients with sensitive solutions that respond to project requirements as well as environmental conditions and cultural influences. Doug is particularly well adapted to a collaborative design process where the project team includes clients and professionals with diverse backgrounds and complementary skills. His extensive resume of built work ranges from regional park systems to intimate gardens.

Experience

Chroma Design is currently working on a variety of projects from bridge aesthetics and urban design to art installations and community streetscapes. Quality assurance and attention to construction details are skills that clients have come to expect from Chroma Design and a portion of Doug's work includes third party quality assurance reviews. Doug also provides graphic illustration services to consultants and owners.
